DESKTOP PLASTIC COMB BINDING SYSTEMS

Plastic Comb Binding Systems provide the perfect finishing touch for materials generated in desktop publishing environments. Excellent additions to any business, home office, or school, these simple-to-operate machines create documents with pages that turn easily and lie flat. Choose from IBICO's colorful array of binding combs and textured covers for distinctive presentations that make a first class impression.

Ibimatic[®] - The Preset Option

The Ibimatic is preset for speedy, foolproof operation in two simple steps—just pull the handle to punch and push to bind. Combining efficiency and economy, the Ibimatic is the ideal solution for binding standard letter size documents in-house.

Kombo[®] - The Adjustable Option

Designed to punch and bind both letter and odd-size sheets, the versatile Kombo punches documents up to 12" in length and features 21 selectable dies. An adjustable binding mechanism locks in the comb opening setting to speed large volume binding jobs. To keep pages flat and secure, a four-position depth selector varies the distance between the punched hole and the paper's edge from $\frac{1}{16}$ " to $\frac{3}{16}$ ". The Kombo's built-in versatility provides maximum production and performance.

1. Insert sheets into machine flush against the rear stop and paper guide.

KOMBO USERS:
Disengage the dies not needed for the document size by pulling dies outward.

2. Punch by pulling handle forward and down.

KOMBO USERS:
Set punch depth selector to appropriate position.

3. Place binding comb behind the metal comb rake and open by pushing the handle back.

KOMBO USERS:
Set comb opening mechanism for optimum binding speed.

4. Place the punched sheets face down in the binding comb and return the handle to its original vertical (neutral) position.

Remove the finished presentation!

The following *quality features* are available on both the Ibimatic and Kombo:

- Rugged, all-metal casing for increased durability.
- Precision ground dies punch progressively for sharp, effortless operation.
- Paper guide and ruler to accurately align sheets.
- Open throat construction for punching extra-long sheets.
- Large, easy access, front-opening waste and storage drawer.
- Two-inch thick comb capacity for binding up to 425 sheets.

Description	Height	Width	Depth	Weight	Hourly Production Rate
Ibimatic	8 $\frac{1}{2}$ " (14" w/lever)	15 $\frac{1}{4}$ "	11 $\frac{3}{4}$ "	19lbs	20 sheets per punch Punches 7,200 sheets/hour Binds 250 books/hour
Kombo	9" (17" w/lever)	16"	11 $\frac{3}{4}$ "	22.7lbs
