

# System Two

Electric Strip Binding System

Experience distinctive,  
prestigious documents with  
the GBC System Two...  
designed with electric  
punching and strip binding  
capabilities.

# System Two

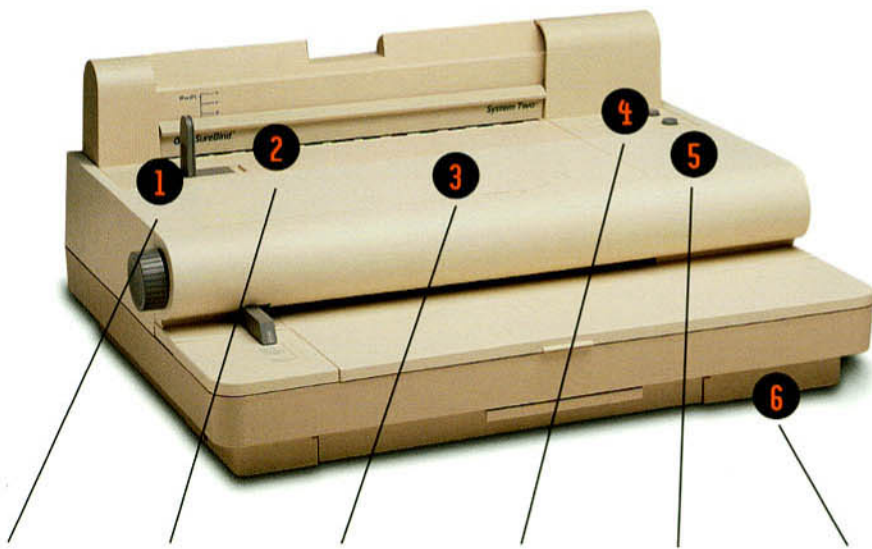

## Professional and Secure:

The GBC System Two is the ultimate desktop strip binding system for moderate volume users. It binds documents as short as a few sheets or as lengthy as 500 sheets. The System Two can be used for document sizes up to a 14" binding edge. Each document looks custom-bound by utilizing the patented SureBind® automatic binding system.

Electric power punching saves time and work, and punches perfectly every time. What's more, there's no need to worry about jams because the Jam-Stopper® reverses the punch if it's overloaded.

## Features:

**Bind documents up to 2" thick with the powerful System Two.**

**1. Punch and Bind Edge Guides:** Ensure accurate alignment of paper for easy, even punching and binding.

**2. Pressure Bar:** Firmly holds documents for a tight, professional bind.

**3. Full-Size Binding Surface:** Maintains page position during binding.

**4. Push Button Electric Punching:** Produces more books per hour than manual systems with operator ease and efficiency.

**5. Indicator Light:** Flashes while binding is in process; goes out when binding is complete – about 10 seconds.

**6. Debris Tray:** Easy disposal of paper chips and binding strip fragments.

Command respect and attention with the distinct look of strip binding for all your proposals, briefs, reports and presentations.

Keep your documents secure with GBC's SureBind elements available in a variety of colors and sizes.

Complete the document with matching covers available in many textures to match your SureBind strips. For a library-quality finish, choose GBC hardcase covers for important presentations.

## Specifications

Maximum Punch Capacity:	22 sheets per lift based on 20 lb. bond
Maximum Binding Capacity:	Up to 2" (5cm) or 500 sheets
Binding Cycle Speed:	10-12 seconds per cycle
Approximate Weight:	45 lbs. (20 Kgs)
Dimensions:	23.5" (60cm) W 10.75" (27.3cm) H 17.75" (45cm) D
Ratings:	115V/60Hz/4 Amps 230V/50Hz/4 Amps
Approvals:	Designed to meet UL and CSA safety standards
