# Bind documents up to 1" thick with the easy-to-use VeloBind System One.

**VeloBind®  
System One™**

## Distinctive elegance plus tamper-proof security.

VeloBind System One produces impressive-looking documents that convey quality and professionalism. The ultimate desktop binding system for low to moderate volume users, System One securely binds books with Velo® binding strips that are heat-sealed into place.

Covers complete the look, and are available in distinctive Regency composition, linen, Leatherette and crystal clear transparent. Or, choose hardcase covers for library-quality books for your most important presentations.

## Designed for maximum versatility.

Documents of any length look great with VeloBind System One. With the standard 1" binding strip, you can bind documents as small as a few pages or as large as 250 pages, yet each document looks custom-bound because the hot knife binding system automatically shears off extra binding pin length as it seals the strips.

And, System One can also be used for a variety of document sizes — up to a 14" binding edge. So no matter what your needs are, VeloBind System One offers a distinctive look that says custom-bound and security that's unmatched.

## Specifications

**Punch:** Manual

**Maximum Binding Capacity:** 1"

**Binding Speed:** Approx. 10 seconds

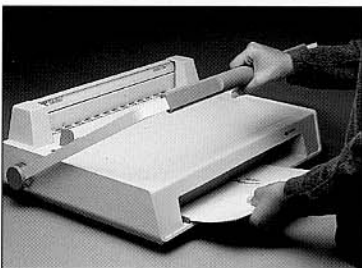

**Dimensions:** 22"W x 7"H x 16"D

**Weight:** 28 lbs.

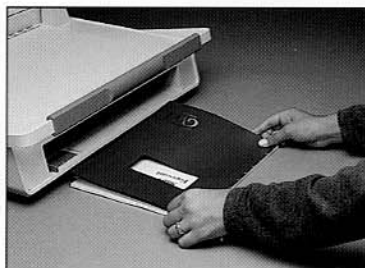

**Power:** Standard 120 volts, 60 Hz, 3 amps  
or, available in some areas,  
220-240 volts, 50 Hz, 1.5 amps.

**Part number:** 9707023

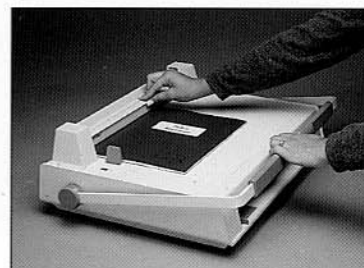

## One unit does it all

First, align pages and lower the handle to punch holes.

Second, add pre-punched covers.

Third, add binding strips and lower the handle to automatically shear the pins and seal the bind.
