The Cassida 5520 is a professional currency counter designed with users in mind. Equipped with features designed to save time and simplify operation, it is ready to take on a variety of cash-processing jobs.

Intuitive operation, simple controls, and automatic features make the Cassida 5520 easy to operate.

Infrared sensors are able to spot a wide range of bill discrepancies, including half, double, and chain notes. In all cases, the 5520 will stop the count, alert the user with a beep, and display the error type on its screen.

Ultraviolet (UV and UV/MG models), and magnetic sensors (UV/MG model) are able to detect a wide range of counterfeit bills. Once a counterfeit is detected, the 5520 stops the count and dispenses the suspect bill into its stacker for removal. Lightweight and compact, the Cassida 5520 is easily transported using the built-in handle. Its contemporary styling blends with any business environment.

Features

- Counts 1,300 bills/min
- Operating modes: ValuCount™, count, add, and batch modes; add + batch mode
