Extra Bond (EXB) low melt laminating film was specifically designed for laminating the output of digital copiers. It will adhere to large areas of toner and other materials where standard high melt films will fail.

If standard laminating films will not bond to your prints, EXB film could be the solution. It melts at a lower temperature, so there is less chance of heat damage to sensitive originals.

The Details:

- Rolls are adhesive side in.
- 1" core.
- Clear gloss.
- Applications: Digital prints from Xerox (Docutech and Docucolor), Nexpress, Xeikon, and similar printers.
- Other names include Super Stick and DryLam SAP.

Features

- 25" x 200'
- Rolls are adhesive side in
