The Cassida C200 is an all-in-one solution for any coin handling need. Easy to use, it counts, adds, batches, and wraps automatically.

The C200 recognizes individual denominations and sorts them automatically into large bins. No dials and no knowledge of coin dimensions required. Just load the hopper, press start, and walk away. Grand total of all coins is displayed and detailed reports for each denominations are within a button's reach.

The C200 includes all the counting modes you would expect to find on a Cassida-designed coin sorter. Batch mode counts amounts as low as 1 coin or as high as 500. An easy-to-read LED display shows both number of coins and dollar amount for each denomination, as well as the grand total.

It takes only seconds to exchange the C200's bins for the included wrapping attachments. One button sets roll batch amounts for all denominations and C200 stops automatically when a wrapper is full, great for fast-paced environments where there is a need to switch between wrapping and bulk sorting.
