**The Cassida 6600 is a professional currency counter** designed to tackle a wide variety of counting jobs. Fast, accurate, and equipped with a host of smart features, it is a reliable all-around performer.

ValuCount™ uses the denomination selected by the user to calculate the dollar value of the count. By activating ValuCount in the add mode, users can count different denominations while keeping track of the total value. Of course, the Cassida 6600 also offers add, count, batch, and add + batch modes, making it the perfect choice when all-around performance is a requirement.

Infrared sensors are able to spot a wide range of bill discrepancies, including half, double, and chain notes. The 6600 will stop the count, alert the user with beep, and display the error type on its screen.

Ultraviolet (UV and UV/MG models), and magnetic sensors (UV/MG model) are able to detect a wide range of counterfeit bills. Once a counterfeit is detected, the 6600 stops the count and dispenses the suspect bill into its stacker for removal. Pressing the start button continues the count and automatically deducts the counterfeit from the overall total.

An intelligent bill density recognition system eliminates time-consuming stops common in conventional bill counters. An innovatively engineered mechanism combines the smooth counting of a back-loading machine with the convenient hopper of a front loader. A built-in handle makes transporting the unit easy.

### Features

- Counts 1,400 bills/min
- Large, top-loading hopper holds 400 bills (new)

- Operating modes: Count, add, and batch modes; add + batch mode
- Value counting with ValuCount™
- Authenticates bills using ultraviolet (6600 UV) and magnetic (6600 UV/MG) sensors
- Infrared sensors detect chain, double, and half notes, as well as variations in note size
- Rugged, heavy-duty construction
- Batch presets plus programmable 1-999
