OUT OF STOCK The CR135 Manual Creaser can score paper widths up to 13 5/8" and as deep as 12 1/2". The CR135 Manual Creaser is designed to score/crease documents or prints that can be damaged easily due to cracking of printed ink. There are two types of scores that this machine will do. One is a single score and if you turn the removable dies to the opposite surfaces it will do a cover and spine hinge with 1 pull of the lever (two opposing scores - 1 for the spine edge and one for the cover opening hinge).

The CR-135 Manual Creaser has a sizing mechanism to create a perfectly sized book cover by setting the mechanism to the amount of paper in the book. The score or crease is applied by even downward pressure rather than by a rotary method, which can allow cracking, tearing or tracking. This manual tabletop machine requires very little effort to pull down the handle for a precise crease. The CR135 Manual Creaser is ideal for any application that requires a perfect score, including greeting cards, book covers and more etc.

Features

- Max Sheet Width: 13 5/8"
- Max Paper Weight: up to 17 pt. cover
- Max Score Length: 12.5"
- Min Score Length: 1 3/4"
