The MBM/Ideal AP15 combines HEPA, activated carbon and plasma air cleaning in one compact unit. It effectively filters harmful substances out of the air: fine dust, pollen and other allergens, viruses and bacteria, mold spores, pet hair, cigarette smoke and even chemical fumes and odors.

What's more, it enriches the air with charged ions. Purified and ionized air – a simple and natural principle with a refreshing result: a vitalizing effect on mind and body, strengthening the immune system as well as protecting against cell damage and premature aging processes, fatigue or diseases. And all this running at very low energy and quiet as a whisper – for optimum use in offices, bedrooms or medical practices – wherever you're looking for ideal indoor air.
