World-beating performance with 5 year general warranty on all parts (excludes blades, cutting wheels & site line strips) and 20 year warranty on the bearings.

The Excalibur 5000 is the essential finishing tool for every printer, graphics, photo, sign and framing workshop. Four precision cutters in one, trim a wide range of materials accurately and in square with minimum effort. The Excalibur 5000 can be mastered within minutes. The bottom cutting head is an ingenious indexed turret mounted that instantly locks any of the three cutting tools into position with no screws or tools required.

The counter balance takes the effort out of lifting the cutting head. When released, the balanced cutting head stays in the last position ready for the next operation. The counter balance weight can be transferred to the upper or lower cutting head with the flip of a switch.

Excalibur 5000 includes:

Four cutting tools: Six of 100 Medium Duty Utility Blades, Acrylic Scoring Blade, Glass Scoring Wheel & Twin Wheel Cutting Tool.

Wall Mount Kit

With a cutting capacity of 63" the Excalibur 5000 is equipped to cut Glass 6mm - PVC Foamboard 12mm - Foamcore 12mm - Cardboard - Acrylic (Plex) 6mm - Xarba 12mm - Polycarbonate - MDF 4mm - and much more without noise, dust or significant odors.

Features

- Improved four-in-one head design for ease of operation
- Score glass and mirrors up to 0.24" thick
- Cut foam core and other mounting materials up to 1/2" thick
- Scoring blade to
- Mount to any wall or use as a freestanding cutter (optional kit needed for freestanding use)
- All weight and cutting force rests on the legs, not on the wall mount
- Large backing panels on both sides give maximum support to the material being cut
- Telescoping legs can be adjusted to suit the height of the user
- All four tools cut along the same cutting line
- Clear plastic strip along the edge of the clamp accurately indicates the position of the cut line
- Ratchet feature allows multiple passes at preset depths for easy cutting of thick or difficult materials
- Variable pressure clamp to securely hold all materials without damaging them
- Counter balance weight cancels the weight of the cutting heads
- Horizontal squaring arm is machined from a single heavy duty aluminum extrusion for perfect alignment

- Single hand wheel at the top of the machine for easy and accurate squaring adjustment
- Two flip stops for accurate repetitive cuts
- Dual calibrated scales for accurate measurement of the cut piece
- Size: 84"(W) x 12-16"(D) x 96"(H)
- Optional free standing kit is available
