The MBM/Ideal AP40 Med Edition is a professional air cleaner with individually replaceable high-quality filter elements. It filters pollutants such as fine dust, pollen and acarid allergens, pathogens such as viruses, bacteria, and mold spores, cigarette smoke, exhaust fumes, chemical vapors, and odors from the air.

The antimicrobial CleanCel® equipment of the device and the antimicrobial coating “MedShield” of the HEPA filter inhibit the growth of microbes and removes pathogens. Optimally selectable PlasmaWave® technology supports the removal of bacteria, viruses and mold spores from the indoor air. When switched off, the device automatically seals the outlet thus keeping its interior clean in this state as well.

The filter change display informs a pending filter change. On an average, the filters have to be changed after 12 months.

Features

- High-quality touch display for intuitive control.
- Provides function modes such as Auto/manual/sleep/turbo.
- In AutoMode, continually monitors the air quality with intelligent sensor technology (sensors for fine dust, gas, odors and brightness) and automatically controls power.
