**The Cassida SmartCheck is a dual UV detector with exclusive Swipe Technology.** Enjoy the convenience of one-swipe detection along with the assurance of conventional visual UV inspection. Just swipe the bill and the detector will beep if the bill is counterfeit. No training or operator knowledge needed.

In addition to automatic swipe detection, suspect bills can be visually checked for UV security thread using the UV illumination.

The built-in ultraviolet illumination can also be used to verify checks, credit cards, driver's licenses, passports, social security cards, and many other forms of identification quickly and easily.

The Cassida SmartCheck is about 6.5" x 4" x 3" and weighs just 11 ounces, making it an easy device to keep at registers, desks, and office counters.

The Smartcheck detects counterfeit bills in foreign currencies such as Euros, Pesos, and most other currencies. There is no need to change settings or have separate machines for different currencies.

### Features

- Revolutionary swipe-detect technology puts an end to awkward verification with detector pens
- Swipe a bill and detector beeps if the bill is counterfeit
- Additional detection in the form of conventional UV light to verify the UV security thread
- Verifies US dollars, as well as Mexican Pesos and most other currencies
- Verifies driver's licenses, ID's, credit cards, checks, passports and many others
- Smallest footprint of any desktop UV detector in the industry

- Ideal for retailers, financial institutions, bars, restaurants and others
- Cost effective and time-efficient tool to protect yourself against counterfeits
